

Mobile Sales Dashboard Report

1. Project Overview

This project presents an interactive Mobile Sales Dashboard developed using Power BI. The dashboard provides detailed insights into sales performance, customer transactions, brand-wise performance, monthly trends, payment methods, and year-over-year comparisons. The project demonstrates skills in data cleaning, transformation, data visualization, business intelligence, and reporting.

2. Project Objectives

- Analyze mobile sales performance across different cities and brands.
- Track monthly and yearly sales trends.
- Compare current year sales with same period last year.
- Monitor transaction count and quantity sold.
- Identify customer payment preferences and rating patterns.
- Create interactive and business-friendly dashboards for decision-making.

3. Dataset Information

Dataset File: Day - 30 - Mobile Sales Data.xlsx

Number of Records: 3835

Number of Columns: 14

Dataset Columns

- Transaction ID
- Day
- Month
- Year
- Day Name
- Brand
- Units Sold
- Price Per Unit
- Customer Name
- Customer Age
- City
- Payment Method

- Customer Ratings
- Mobile Model

4. Tools & Technologies Used

- Power BI – Dashboard creation and data visualization
- DAX – KPI calculations and measures
- Power Query – Data cleaning and transformation

5. Dashboard Features

- Interactive slicers for month, mobile model, payment method, and year filtering.
- KPI cards showing Total Sales, Total Quantity, Average Price, and Transactions.
- City-wise and brand-wise sales analysis.
- Monthly quantity and daily sales trend visualization.
- Payment method distribution using pie chart.
- Customer rating analysis.
- Same Period Last Year (SPLY) comparison dashboard.
- Month-to-Date (MTD) sales tracking dashboard.

6. Key Insights

- Delhi generated the highest sales among all cities.
- Apple and Samsung were among the top-performing brands.
- UPI and Debit Card were the most preferred payment methods.
- Sales performance showed consistent monthly growth.
- Customer ratings were mostly positive with a higher count of good ratings.
- The MTD report displayed steady sales growth throughout the month.

8. Business Value

This dashboard helps businesses monitor sales performance, identify top-performing products and cities, understand customer behavior, and make data-driven decisions. The interactive visuals improve reporting efficiency and provide real-time insights.

9. GitHub Repository Content Suggestion

Recommended files to upload on GitHub:

- Power BI (.pbix) dashboard file
- Dataset Excel file
- Dashboard screenshots
- Project report document
- README.md file with project explanation

10. Conclusion

The Mobile Sales Dashboard project successfully demonstrates practical skills in data analysis and business intelligence. The project showcases the ability to transform raw data into meaningful insights using Power BI dashboards and interactive reports.
